Subject: RE: DRAFT proposal of permit decision

Pat,

I have a few thoughts in red below. **Ex. 5 Deliberative Process (DP)** Can you send back a revised version? Thanks for working so quickly on this. I will want to send this to Carl and Deb at the same time you send it to HQ. OGC should review it as well.

Thanks.

Lynne

Subject: DRAFT proposal of permit decision

Hi all,

Ex. 5 Deliberative Process (DP)

Let me know your thoughts. Thanks!

Issue: On Jan 11, 2022 (35 days after the close of the comment period), letters addressed to Administrator Regan were sent by a concerned citizens group in Long Island, New York about environmental concerns related to the South Fork Wind Farm, a 130 MW offshore wind farm proposed for construction southwest of Martha's Vineyard, Massachusetts with an export cable extending to East Hampton, New York. One of these letters raised concerns about EPA's pending decision related to the OCS CAA permit and the Agency's decision to not require offsets for construction-based emissions. EPA Region 1 was scheduled to finalize the permit on Jan 18, 2022.

Background: EPA's proposed decision to not require offsets for construction-based emissions went through a notice and comment procedure, and the comment period closed on Dec 6, 2021. EPA received three supportive comments and no adverse comments on the proposed decision. The concerned citizens group did not comment at all during the public comment period.

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Region 2 will take the lead in responding to the incoming letter, with a response issued after the final permit is issued. The response will be coordinated between regional offices, OAQPS, and OGC.
